Progress around the world

We help procurement reformers to build coalitions of change, publish & use data, measure progress & to institutionalise reforms

Open Contracting Data Standard (OCDS)

Focus on the **use** of data to drive change

Four key user needs:

Value for money & efficiency

Integrity

Effective service delivery

Level playing field for business

**Openness helps
to build trust
between
Government,
Citizens and
Business**

Lessons learnt

1. **Identify your political leader and invest in the team & partnerships.** Get people who share your values and your big “why”. You will build their capacity, but it will be hard to change values and motivation. **Engage business and CSOs from the very beginning!**

2. **Think big, start small, gradually develop & implement** - give an opportunity to buyers, business, and other stakeholders to **learn on small value contracts**. This would be a great start to rebuild trust and open new opportunities for SMEs.

Lessons learnt

3. **Publish open data and provide real-time analytical infrastructure from the very beginning** - nothing will give you more support than openness and opportunity for everyone to control, monitor, and use benefits of data. **Everyone sees everything** - don't be afraid!

4. **Invest in feedback, complaints review and oversight** - develop your processes and systems from the very beginning to understand potential loopholes and continuously improve.

Lessons learnt

5. **Continual engagement and change management** across stakeholders (not a one off) especially with civil society which help scale reform, foster trust & protect progress

6. **Capacitate all the key stakeholders.** Roadshows, MOOC, Resources library, conferences, universities, chambers of commerce, consultants. Everywhere!

7. **Use secondary regulations** to implement measures like the Open Contracting Data Standard in all systems (and put into eGP specifications)

Lessons learnt

8. **Invest in communications and public relations.** Build a strong brand of your reform that would be supported by all stakeholders.

9. **Government using data itself** is vital to improving data quality for all users = growing a performance culture

10. Use **KPIs** and their regular measurement to track implementation of the reforms

Our offer to Lebanon

1. We can help you publish, share and use **standardized, structured, open contracting data**
 - Backed by **free global helpdesk** to assist publishers
 - Treasure trove of **analytics & tools available**
 - **Costs low, benefits high** (200:1 in Ukraine)
 - Resilience of Covid-19 responses
2. Help you think **how information will be used**, by whom, for what (**value of money, anti-corruption**), not just transparency for own sake
3. Methodology and advice to work with **service delivery departments** & make case of how open data on procurement can help them

Our offer to Lebanon

5. We can help with building **civic engagement** around data to foster usage
6. Assistance with **change management** on national and **municipal level**
7. **Peer-to-peer learning with eGP systems administrators, developers, and implementers.** From our EECA and LatAm communities.
